

DIECAST CAVITY PARTS

NIHON SEIKI CO., LTD.

Feature

The insert and core die is one of our main item. Especially, Water Jacket (WJ) for Engine block die-casting die is our special product. We produce over 100 pieces WJ a year (sales result in 2013-2014)

Our quality is a result of our 100 year history. We have produced 250 complete Engine block die-casting dies so far. We have the newest technology and equipment including 3 axis, 4 axis, and 5 axis CNC machines. We use hard milling and the result is making less use of EDM. It will increase shot count life for your die-casting die. Our experience and new technology will help expand your future.

TRANSMISSION

DIECAST CAVITY PARTS

NIHON SEIKI CO., LTD.

Feature

Auto transmission die-casting dies and transmission case die-casting dies are also the most representative items in our products, and we have produced over 1000 pieces for each item so far.

As well as Engine block, transmission case is very important part.

We specialize in producing spline cores for FF and FR.

We have produced 50 pieces of spline a year (sales result in 2013-2014).

We always use the 5 axis machine, reducing the need for EDM and to keep items a good quality. Our specialized spline cores will win in a highly competitively market.
